Functional features

Power consumption metering

Energy consumption history

Controlled remotely

Z-Wave network tester

Download FIBARO app for smartphone

Your Wall Plug is ready to be added to the Home Center.

Wall Plug must be in range of the Home Center because it requires a direct communication with the controller.

Start inclusion mode

STEP 1
Go to Settings.

Start inclusion mode

STEP 2
Press "add device".

STEP 3
Press "Next".

Inclusion mode has been launched

Add your device

It is recommended to use the socket located possibly the closest
from the Home Center.

STEP 4
Insert the device
in the power outlet.

Once the Plug is turned on,
the LED ring will glow red.

# Processing your configurations

The device has been added

STEP 5
Name the device and assign it to the room.

Installation

STEP 6
Insert the device
in the power outlet.

If the LED ring glows green, it means that the device has been added successfully to the Home Center.

If the LED ring glows red, it means that the device has not been added successfully to the Home Center. System configuration needs to be repeated.

Network range test

It is recommended to check if the device's destination
is in range of your Home Center.

STEP 7
Hold the button for a few
seconds until LED ring
blinks violet.

STEP 8
Release the button,
and press it again.

Network range test will be activated.
LED ring will indicate the quality
of the network range.

Network range test – quality indicator

Direct
communication

Routed
communication

Limited
communication

No signal! The device
will not work correctly!

STEP 9
Press the button in order
to leave testing mode.

Wall Plug data available in the energy usage overview panel.

The energy usage panel is available in FIBARO app for tablet, PC and MAC.
