14. Clean the surface to which you want to attach the strip on and remove the protective seal from the back of the strip then use the adhesive back to fix the strip onto the surface.
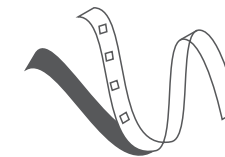

15. Troubleshoot
If the Adurosmart strip is not recognized by your smart home hub then follow the below procedure to reset the strip back to factory default.

Disable and enable the power to the strip 5 times so that it turns ON/OFF 5 times. The strip will then flash 3 times to confirm the reset. Power the strip ON and proceed with step 11.
