

Homey Bridge at a Glance

Product Summary

Homey Bridge

Homey Bridge allows smart home products from different brands and technologies to speak the same language. Connect your wireless devices with Homey Bridge and easily manage, control and automate them all from the Homey app.

Homey Bridge includes six wireless technologies: Wi-Fi, Zigbee, Z-Wave Plus, Bluetooth, 433MHz, RF and Infrared. Utilizing these smart home technologies, Homey Bridge works with 50,000+ products from over 1,000 popular brands.

Homey Bridge includes three months of Homey Premium. An active Homey Premium subscription of \$2.99/month is required to connect more than five devices to Homey. Users can always use up to five devices for free, without any subscription and including an unlimited amount of Homey Flows.

Homey

Homey also works with many cloud-connected devices, such as Philips Hue (via the Hue Bridge), Sonos, Spotify Connect speakers and more, without the need for Homey Bridge. Homey Bridge is an optional extension to Homey and allows connections to local devices, like Z-Wave sensors or Zigbee bulbs.

Homey is completely free of charge for up to five devices, combined with an unlimited amount of Flow automations. For 6+ devices, the Homey Premium subscription of \$2.99 allows an unlimited number of devices.
